RE: REVISED CENSUS TRACT MEDIANS

Attached please find the revised census tract median sheets, which supersede any previously issued median sheets. These medians were calculated using currently available information on the certified base rents and are subject to change as more information arrives. For example, over 2000 units did not have the number of bedrooms listed. Such units were eliminated from the calculations but will be included when bedroom information is obtained.

RE: METHODOLOGY OF MEDIAN RENT CALCULATIONS

The median rents for each census tract were calculated using the following guidelines:

1. All data is from the database which was used to send the apparent lawful rent notices in January of 1989.
2. With the exception of previously exempt tri-plexes and four-plexes, only those units with non-zero rent on 05/31/80 are used. The medians were calculated using the 1980 certified rents.
3. For previously exempt tri-plexes and four-plexes, calculations were done using the 1981 certified rents on units which had non-zero rents on 12/31/81.
3. The median of a category is defined as the middle value of that category, with an equal number of values above and below it. If the sample size is an even number, the median is the average of the middle two values.
4. Half-bedrooms were not counted. For example, a house with 3-1/2 bedrooms was considered to be the same as a 3-bedroom house.
5. Units which did not have the number of bedrooms listed were excluded.
6. The projected median rent for 1989 is derived by taking the median rent for 1980 (or, if appropriate, for 1981) and applying the full Annual General Adjustments to the number. Utility increases are not applied. Numbers are rounded up for each year, but they are not rounded down.
